

Tunnel Vision

Turn our focus on tunnel systems into your advantage.

When it comes to setting the standard in tunnel car wash systems, we'll be the first to admit we're a little obsessed. Our single-minded focus on customizing the most complete and well thought-out tunnel solutions has paid dividends to car wash operators throughout North America, boosting performance and volume while driving down costs and labor. Now add in our total service commitment and extensive network of expert distributors and that's a preoccupation worth looking into.

PERFORMANCE PLUS TUNNEL SYSTEMS

Designed for 90 cars per hour or more, the Performance Plus Tunnel system is a full service tunnel that offers the car wash operator flexibility, durability and ease of operation while focusing on two key issues; cleaner cars and higher profits. Performance Plus Tunnels allow for complete wash control and accuracy by

including independent controls and modem-linking capability for remote diagnosis. It consists of a wide range of top quality wash components designed for high throughputs, low maintenance, site specific ordering, upsell capability and the reduction of manual prep labor.

America's **BEST CONVEYOR**

RG-440 Conveyor

The RG-440 Conveyor has earned the reputation as the best in the industry. With its simplicity of design and innovative features, the RG-440 delivers reliability, maintenance-free operation and safety. Features include; anti-jam roller, trap doors at entrance and exit, manual roller-up, "Best in Industry" inter-connecting chain and roller design and remote grease points.

TECH 21
ADVANCED DRYING SYSTEM

The Tech 21 delivers the perfect dry for all types of vehicles including those hard-to-dry vehicle backs and side mirrors. With its revolutionary SMART nozzle, the Tech 21 gives you complete drying control. You can easily control the amount and direction of airflow with the use of its hand-held remote controller. The Tech 21 also offers the ultimate in flexibility by featuring package systems or as a customized Pro-Build system.

ELIMINATOR
FULL FORCE WHEEL CLEANING

RW-103 Eliminator

The Eliminator cleans the areas that require the most manual prep work – the wheels and lower rocker panels. It features aluminum construction, 16 high-pressure spray nozzles with no "high pressure swivel joints," adjustable mounting brackets and adjustable hydraulic controls for easy speed alterations and maximum coverage. The optional Following Feature increases cleaning time and coverage area.

GET RESULTS

FOAM HAWK

RW-114 FoamHawk

The Foam Hawk triple foamer increases wash revenues while providing a pleasing visual display for customers. It consists of three foam applicators mounted to two Pro-Coat treated, freestanding mounts and comes with multi-angled neon signage.

SuperFlex

RS-701 SuperFlex Wraparound

The SuperFlex wrap-around combines the simplicity of a flex wrap with the gentle pressure of a high side washer. It offers hydraulic brush clutching, license plate and rear wiper protection, stainless steel manifolds and a short shaft design. With its increased dwell time and controlled cleaning pressures, it reaches hard-to-clean areas while providing gentle pressure to delicate areas.

Minimum Wash Bay Requirements:

- Tunnel Length: 65' (19.76M)
- Tunnel Width: 16' (4.88M)
- Tunnel Height: 12' (3.66M)
- Electrical: 70HP
- Water: 85GPM (322LPM) @ 50PSI (3.5BAR)
- Air: 5HP (13CFM) @ 120PSI (8.6BAR)

EVOLUTION RS-1000

Evolution RS1000 Top Brush

- Cantilever design for mounting on either side of wash bay
- Available in hydraulic drive or electric drive versions
- Minimal space requirements
- Utilizes Envirosoft 2nd Generation foam
- Removes front window eyebrows and cleans upper back windows of SUV's and mini vans
- Forgiving of vehicle extrusions such as antennas, roof racks and bug shields

HELIX
CROSS CLEANING SYSTEM

Helix (optional)

With up to 7 high-pressure, oscillating spray heads, the Helix Cross Cleaning Machine eliminates the need for manual prep labor. Ideal for either the pre-wash or rinse areas, the Helix does the prep work for you. It guarantees complete vehicle coverage with its front-to-back flipping capability and provides maximum range oscillation while reaching those hard-to-clean areas.

GET MACNEIL

> THE MACNEIL ADVANTAGE

- Ideal for high-volume sites requiring maximum throughput
- Higher line speeds contribute to profitability without sacrificing performance or vehicle protection
- Automated technology and time-saving features decrease or eliminate prep and finish work
- Superior designs and components lower operating, labor and maintenance costs and boost profitability
- Revolutionary top brush provides superior wash results over mitter systems
- Many optional upgrade products
- May be custom designed to meet site specific needs
- Unsurpassed throughput and wash quality

About MacNeil Wash Systems

MacNeil Wash Systems was established in 1982. The Company designs and manufactures quality car wash systems for the tunnel car wash industry and for the automotive dealer, fleet and rental markets. MacNeil products are engineered to provide superior cleaning performance, reduced maintenance, increased production, maximum cost savings and equipment longevity. All MacNeil equipment is backed by our focus on service excellence. We distribute and support our products through a North American network of more than 40 distributors that is second to none in capability and performance.
